These figures show how much the average household would spend in this property for heating, lighting and hot water and is not based on energy used by individual households. This excludes energy use for running appliances like TVs, computers and cookers, and electricity generated by microgeneration.

## Energy Efficiency Rating

The graph shows the current energy efficiency of your home.

The higher the rating the lower your fuel bills are likely to be.

The potential rating shows the effect of undertaking the recommendations on page 3.

The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60).

The EPC rating shown here is based on standard assumptions about occupancy and energy use and may not reflect how energy is consumed by individual occupants.

## Top actions you can take to save money and make your home more efficient

| Recommended measures                        | Indicative cost | Typical savings over 3 years | Available with Green Deal |
|---|-----------------|------------------------------|---------------------------|
| 1 Floor insulation (solid floor)            | £4,000 - £6,000 | £ 114                        |                           |
| 2 Low energy lighting for all fixed outlets | £70             | £ 153                        |                           |
| 3 Solar water heating                       | £4,000 - £6,000 | £ 90                         |                           |

See page 3 for a full list of recommendations for this property.
